# Go-Ngoding

Description:

E-learning is an educational system or concept that utilizes information technology in the teaching and learning process. Go-Ngoding is an E-learning website that provides Programming Language learning services. In addition to providing learning services, this application provides services to direct work to Go-Ngoding students when they have completed each class according to the expected profession. Go-Ngoding provides assistance to students to make it easier to find work in order to reduce unemployment in Indonesia.

Project Description:

This project is an e-learning website design made with a team. I had the responsibility to apply the design to a website page.

Framework : Materialize

Here are some screenshots from the project.
